Education

Institute of Engineering and Management

Bachelor of Technology in Electronics and Communications Engineering (CGPA: 8.8)

Aug 2019 – June 2023

West Bengal, India

Experience

PwC India, Kolkata Frontend Engineer, Aug 2023 – Present

- Developed and maintained **20+ high-performance, data-driven UI components** using **React.js**, **Material-UI**, resulting in a **30%** improvement in user interaction speed and interface responsiveness.
- Implemented **real-time communication modules** using the **WebSocket API**, enabling **live data synchronization** and reducing update delays by **40%**, enhancing collaborative features.
- Integrated and optimized **RESTful API interactions**, handling **dynamic JSON requests/responses** for **15+ endpoints**, improving API performance and streamlining frontend-backend communication by **25%**.
- Designed advanced **sorting, filtering, and conditional rendering** features using **Material-UI data tables**, enabling efficient manipulation of large datasets and enhancing user productivity.
- Built a responsive, **interactive charting system** with **ApexCharts**, **FusionCharts**, including drill-down navigation and multi-series visualizations, improving data interpretation and reducing user task time by **35%**.
- Developed **geospatial visualization features** using **Leaflet.js**, mapping over **10,000+ data points** and enabling actionable insights through enhanced location-based UI representation.
- Collaborated cross-functionally with product, design, and backend teams in **Agile/Scrum environments**, contributing to **10+ sprint releases** with consistent delivery of pixel-perfect and accessible UI features.

Technical Skills

Frontend Technologies: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, Material-UI, Redux, React Router

Backend Technologies: Node.js, Express.js, MongoDB, RESTful APIs, WebSocket API

UI/UX Tools Libraries: Figma, Framer Motion, React Hook Form, Chart.js, ApexCharts, FusionCharts, Leaflet.js

Version Control Dev Tools: Git, GitHub, Vite, Webpack, NPM, Postman, VS Code

Testing Quality: Jest, React Testing Library, Cypress

Computer Science Fundamentals: Data Structures, Algorithms, System Design

Project Description

ManagePro

<https://www.managepro.net.in/>

A full-stack business management platform for gyms, libraries, and similar services, enabling seamless user management, payment tracking, and real-time data visualization.

Key Contributions:

- Developed responsive UI using **React.js**, **Material-UI**, **Tailwind CSS**, and integrated interactive charts via **FusionCharts**.
- Implemented secure **JWT-based authentication** and full **CRUD operations** for user management.
- Integrated **Razorpay SDK** for payment processing and dynamic due/overdue tracking.
- Automated SMS alerts using **Twilio API** for payment reminders and subscription updates.
- Enabled **Excel file uploads** for bulk data import, streamlining onboarding workflows.
- Built a scalable backend using **Node.js**, **Express.js**, **MongoDB** with modular **REST API architecture**.

Achievements

LeetCode: Solved 730+ problems, current highest rating of 1731.
